March 2020 Software Highlights

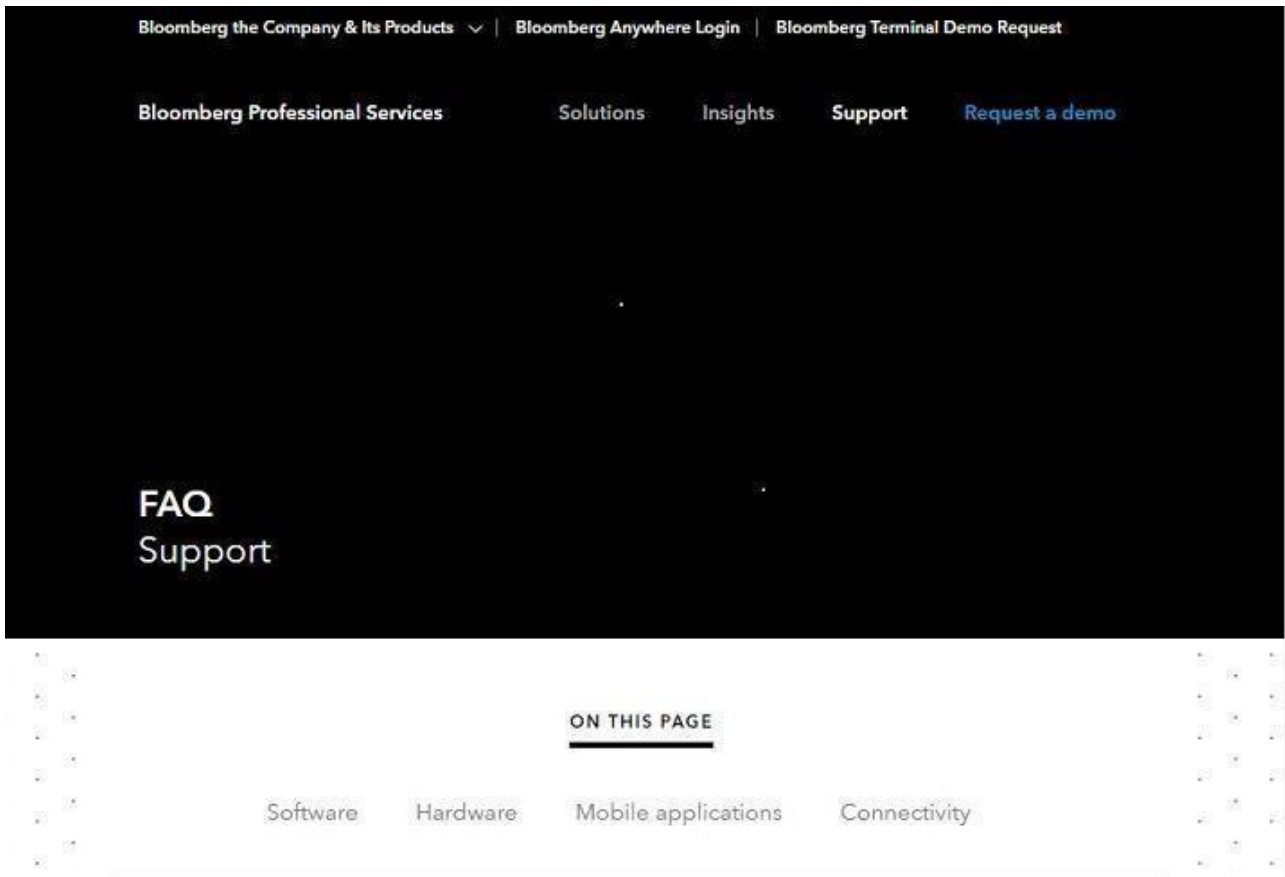

Bloomberg Application

- Stability improvements to Bloomberg Application.

Miscellaneous

- Historically the Bloomberg Terminal version has been a number that resembled a date, e.g. 03/08/2020 represented a version that was released in March. Due to changes in how we build and deploy the Terminal, we are moving to a modern version format represented by Branch.Build (v35.16). Soon, you'll see this version on several Terminal screens such as Login Screen, UPGR<GO>, VERS<GO>, etc.

Office Tools Installer

The installer for this component contains support for both 32-Bit and 64-Bit versions of the Microsoft Office product. The package will detect which version of Microsoft Office is installed on the workstation and then install the appropriate package.

For any client wishing to extract the separate installers, the bslaMMDDYYYY.exe installer supports a /s/o switch that will copy two files (bslaupd_32.exe and ot64upd.exe) into the \blp\Wintrv directory.
