BLOOMBERG USER WORKSTATION REQUIREMENTS

English

3 April 2018
Version: 3.0

Customer Workstation Requirements

The workstation requirements are based on the needs of the primary user. Higher specifications may be required depending on usage of the BLOOMBERG PROFESSIONAL® Service. Users monitoring fast moving markets in Launchpad as well as users of our trading system platforms should consider the recommended specification as a minimum requirement.

Enterprise IB and STP Portal users using the full-terminal install would follow the same requirements for the full-terminal.

Enterprise IB and STP Portal users with the small footprint would have the same recommended requirements as the minimum requirements for the full terminal.

AIM/SSEOMS/EMSX/ETOMS/TSOX/FXGO users should refer to the specifications on page 3.

Please see the Software Compatibility Matrix under [Documentation](#) section for further details on supported Operating Systems and Microsoft Office products.

Recommended Requirements for users of the BLOOMBERG PROFESSIONAL® Service

Components	Specifications
Processor	Intel 4 th Generation Core i7
Operating System	Microsoft Windows 7, 64-bit
